Bachelor of Mis

Delta High of Computers
and Management
Information Systems

LANGUAGE

- English- pre Intermediate

PROJECT

Medical website

A project that allows users to find pharmacies, hospitals, and all medical services near them, view information about them, search for medical information about diseases and medications, and chat with doctors to discuss health issues. It includes a SQL database with tables for everything on the site and connects to an API using PHP.

https://pharmafriend.info.uk/pharma_friend/front/home_page.php

Blog Website

A small blog site that allows creating, editing and deleting comments using Laravel.

Personal website

Create a responsive design that supports laptops and phones, gives a profile of the person and showcases their skills and projects, using Laravel and some front-end skills.
